

When the finish hangs in the balance, you'll be glad Hines is on your team

How do top racing teams keep critical components properly balanced? They use balancing machines from Hines Industries. We're known for precision, advanced technology and easy operation – and we'll even paint the machine in your team colors.

Legend Series Exclusive Features:

- User-friendly touch screen menu (Windows 7 platform*), with 19-inch color flat panel display
- Efficient footprint with base integrated electronics and proprietary cable management system
- Superior laser alignment to ensure accuracy of corrections
- Industry-leading post-sale service and support
- Custom colors and graphics available at no extra cost

Helping racing teams win for 30 years

See what Hines Balancing Machine users have to say:

"The Hines Dominator was the best investment our company could have ever made. We have balanced over 3,000 crankshafts in the last 7 years. It's trouble-free with great repeatability."

■ **Clint Anderson, Owner**
CNC-Motorsports
South Dakota

"I chose the Hines Balancing machine because I used them in the past and they always work great."

■ **Brad Seidl, Machinist**
KMJ Performance
Ames, Iowa

"We chose a Hines Balancer because it is known as the industry standard and is used by nearly all the top racing teams."

■ **Cliff Tufty, Owner**
Northern Auto Parts
Sioux City, Iowa
